

# Storage

SKU MATRIX-DSS

## Overview

A 4U 36 x 3.5" SATA HDDs (24 Front, 12 Back) scalable data storage solution that's optimized for smart city data storage of video monitoring, infrastructure data, and chain-of-custody of recorded events. Tensor Core Processors accelerate encryption. Remote access and management with IPMI 2.0 with virtual media over LAN and KVM-over-LAN support. This is a large device weighing 102 pounds when fully populated with 36-drives.

matrixOS

- Tensor Core Processors for acceleration
- 1200W Redundant Power Supplies
- TPM 2.0 zero trust security
- 2 x 10 GbE
- Made in USA
